DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael W. Kim on September 29, 2004.

The application has been amended as follows:

In the claims:

Amend claim 1 as follows:

7. (Currently Amended) An appliance for opening and closing reagent container stoppers in a partially or fully automatized analysis apparatus, wherein said apparatus includes a pipetting-needle carrier and said appliance comprises: a plunger for opening and closing a reagent container stopper by engaging and releasing a catch on the reagent container stopper, the plunger movable between an at rest position and a working position; an automatic conveyor for moving the reagent container relative to the plunger, wherein the conveyor is movable in a first direction to place the plunger in a position to open the stopper, and wherein the conveyor is movable in a second direction, opposite to the first direction, to place the plunger in a position to close the stopper; and a structure for translating movement of a pipetting-needle carrier to the plunger to cause movement of the plunger wherein the structure for translating

Art Unit: 1743

movement includes means for moving the plunger in a downward direction in response to movement of the pipetting-needle carrier in an upward direction.

Allowable Subject Matter

1. Claims 7, 9-11, and 14-21 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach the structure for translating movement includes means for moving the plunger in a downward direction in response to movement of the pipetting-needle carrier in an upward direction (claim 7) nor the limitations of claim 11 (see previous office action).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Watson et al. discloses a sample distribution system that comprises a cap removal element.
